- **About the project:**

MEVOS Company, within the project "Protection of soil and water resources in the Region of Southern Nations, Nationalities and People" provides administrative management services to the character of the individual outputs of project F, G, H, I, K, L, namely:

communication with the investor of the project, project management, professional cooperation in the implementation of water and sanitation outcomes, cooperation and leadership of the team in Ethiopia, administration and other activities related to the subject contract.

The objective of the water management project implemented in the area of Helaba Special Woreda in Ethiopia is the rehabilitation of the wells for drinking water, the construction of new water distribution points, and the implementation of a water supply with four rain water collection systems. In addition, the project aimed to train and educate the local residents in hygiene and sanitation and incorporated the transfer of know-how and the building of latrines and washing facilities, and the supply of kits for measuring technical analysis of drilled wells.
